Position Description

Project Manager

Cresco Australia
Location: Wagga Wagga, NSW or remote
Reports to: Head of Civil Engineering & Projects
Role Type: Full-time

About Cresco Australia

Cresco Australia is a growing multidisciplinary engineering and project delivery consultancy supporting residential, commercial, and industrial developments across NSW and wider Australia. We pride ourselves on technical excellence, collaborative delivery, and providing high-value outcomes for clients and project partners. As we continue to expand, we are seeking a highly capable and technically driven Project Manager to play a key role in our project management discipline.

The Opportunity

We are looking to further grow our team by adding a Project Manager to our team. The person should be interested in long-term employment, be keen to learn, & have the ambition to develop themselves further as the company grows. The role offers diverse exposure to project management across various industries and collaboration with multidisciplinary teams.

Key Responsibilities

- Oversee the planning, execution, and completion of projects across multiple sectors, ensuring they are delivered on time, within scope, and within budget
- Act as the primary point of contact for clients, ensuring clear communication and strong relationships
- Develop and maintain detailed project schedules and work plans
- Coordinate with internal teams, including engineering, drafting, and architecture, to ensure project objectives are met
- Identify and manage risks, ensuring proactive problem-solving and decision-making
- Prepare and present progress reports, including financial updates and resource allocation
- Manage project documentation, ensuring it is accurate, up-to-date, and accessible
- Ensure compliance with company quality, safety, and environmental standards
- Must be able and willing to travel

About You

Essential

- Bachelor's degree in Project Management, Construction Management (or equivalent accredited qualification)
- 3-5+ years' experience in project management, preferably within engineering or construction industries
- Strong understanding of project management principles, tools, and methodologies
- Proven ability to manage multiple projects simultaneously and meet deadlines
- Excellent communication and negotiation skills
- Proficiency in project management software such as Microsoft Projects, or similar
- Familiarity with Australian Standards and relevant regulatory frameworks
- Strong problem-solving skills with the ability to think strategically
- High attention to detail and a commitment to delivering quality outcomes
- Proficiency in Microsoft Office applications, particularly Excel and Word

Why Join Cresco Australia?

- Influence and shape the project management function of a growing consultancy
- Supportive leadership that values technical excellence and innovation
- Opportunities for career progression into discipline leadership
- Collaborative culture with the freedom to drive improvements and contribute to Cresco's strategic direction

Employment & Remuneration

- The role consists of travel to rural and remote areas
- A competitive salary will be negotiated with the successful candidate based on experience and qualifications
